

STROMBOLI Klaus Michel 2024 - the complete lyrics

words and music: Klaus Michel

Stromboli

I saw your silhouette the very first time
I always dreamed of you, you, and your aura

You were running up the hill
where freedom is
or death
or death

I saw your silhouette in the morning fog
and I' am alone, but you are in my heart

You were running up the hill
where freedom is
or death
or death

And when the sun is rising, and lava's flowing down
and the moon is full and the sea is swallowing, everything I know...
your silhouette, your aura
I know nothing about you, nothing about you

Here with you

There are places we've been and places where not
and you are free to leave I deserve what I got

But everywhere I go I will think of you
and everyone I meet I will compare to you

Here with you, here with you, all night long
here with you, here with you, in my mind
you're not here with me, here with me, any longer
here with me, here with me, anymore

If you think of me later if you think about all
they say haughtiness comes before you fall
but every time I think of you every night, every day
cause you're the only one that I really adore

And I'm here with you, here with you, all night long

here with you, here with you, in my mind
you're not here with me, here with me, any longer
here with me, here with me, anymore

And I'm here with you, here with you, all night long
here with you, here with you, in my mind
you're not here with me, here with me, any longer
here with me, here with me

Don't be cruel to a fool

All those things I did to you
caused you to become estranged from me
I've totally lost my way, during this time
it took me too long to see...

What makes me hard, makes me a fool
don't be cruel to a fool

Days turned into weeks, and months and years
I forgot that nothing compares...
to you my love, my heart, my only one
I maybe thought that I'm the only one

What makes me hard, makes me a fool
don't be cruel to a fool

On that day all my words went wrong
they made you cry; they made you run away
to a place that someday was paradise
and I deserved to burn in hell

What makes me hard, makes me a fool
don't be cruel to a fool

On that day all went true and clear
I felt so naked, I felt so alone
nobody deserves silence
and do I deserve you?

What makes me hard, makes me a fool
don't be cruel to a fool

Fading away

All the silence in between us
love fades away
all the hate dividing people
dreams fade away

All the lies they ever told us
faith disappears
all the bombs falling from the sky
live fades away

As a friend

When you can't decide, what needs to be
a decision long been made for you
because his love has conquered you

When you don't know what tomorrow brings
joy or just annoying things
there is a heart out there, there is love out there...

And I wish you so, don't let go
hearts are hard to find as you know, oh oh oh

It seems you live between the tides
and no place, where you can hide
let him take you by the hand
let him kiss your lips
he's more than a friend, he's a gift

There no one else, who adores you like that
honest and acting like an acrobat
maybe now and forever, maybe one last time
maybe the heart you've found
knows you're the heart to be found

And I wish you so, don't let go
hearts are hard to find as you know, oh oh oh

Don't you have enough of your broken heart?
wake up and find the missing part
his compliments, his faithfulness
he has the strength that only lovers have

And I wish you so, don't let go
hearts are hard to find as you know, oh oh oh

And I see you hand in hand
And I feel there are no bans

War (again)

Fighting for a square kilometre
is useless all in all
fighting for an ideology
it's them controlling all

Who gives you the right?
Dividing between good and bad
the bad are the others, the good always us
but we are one!

I've never been to war
always this cruel law
the world is at war
they always want more

It's the border in their head
of those who give the commands
it's them saving their lives
while mothers cry and fathers die

I've never been to war
always this cruel law
the world is at war
they always want more

War
always this cruel law
the world is at war
they always want more

And they feed, the machine, and they crawl out of their hiding
places...
they bring darkness, resentment, fear and a false and
backwards religion

Don't kill your neighbour, a friend
your unknown brother, or someone's lover

Lost again

Speak to me
like I needed to
friends may come, and you may go
comes the snow

Ah, ah, ah...
ah, ah, ah...

Without your love
I'm lost again
I need to be far away from here
with you my love

Ah, ah, ah...
ah, ah, ah...

I'm too old
not young enough
to start it all, to leave it all
nowhere to hide...

There's no peace without forgiveness
forgive me!
only you know what you want, if you try
everything, that we suppress will resurface

Ah, ah, ah...
ah, ah, ah...

This is how

There is no excuse for killing
I just try to make my sense of it

By the sea they live crammed together
no future, no chance to hide
an explosion, a fire, then thousands die...
the answer to grief is death

This is how, this is how summer ends
this is how, this is how things are going on

They were dancing, just dancing the night away
blind hatred killed them there
this night will be cold and long...
please let someone talk in peace, yeah...

This is how, this is how summer ends
this is how, this is how things are going on

This is how, this is how summer ends
this is how, this is how things are going on

Alright

Come on, it seems to be a good day
come on, we might lose
come on, and start it all again
when you feel that you're far away from the sea and love

Come on, come on
oh, come on...

You and I can fall and our love will die
but love can raise, we got nothing to lose

Oh, come on, come on
oh, nothing will be wrong next time...

Come on
come on

Tunnels and fences (Gaza)

Let them out of here
let the people go
bring water
bring hope
bring love
bring everything (they need)

Tunnels and fences
tunnels and fences
tunnels and fences

Tunnels and fences
tunnels and fences
tunnels and fences

Going down

Once we made a promise
that we always will keep
so easy to say
when love is so deep

Going Down, going down, going down

Times they got harder
as hard as it could be
I said that I love you
but you want to be free

Going Down, going down, going down

You're here again
and you make a new promise
and I ask me if I can
believe that you're honest

Going Down, going down, going down, going down, going down

I wonder how things
can change in a day
yesterday you told me
you'll go your own way

Going Down, going down, going down, going down, going down

When you wish that her love
comes back to you
and you promise everything
to make it come true

Going Down, going down, going down, going down, going down

In the end there's a feeling
that you need to keep
deep inside you, you have to be free

Going Down, going down, going down, going down, going down

In Fall

When the sun is rising up
but you cannot see the light
it's a rainy day, it is fall, after all

When my words get stuck in my throat
and uncertainty fills the room
on a rainy day in fall
feeling small

God put a light on us two
All that we've been through

After all
in fall

Comes a time in fall again
when silence covers everything
then you need no words to explain
I love you
I love you

Light on us two
and all that we've been through

After all
in fall
